

HI97101

Bromine, Free and Total Chlorine, Cyanuric Acid, Iron LR, Iodine and pH Portable Photometer

• Advanced LED optical system

- Innovative optical design that utilizes a reference detector and focusing lens to eliminate errors from changes in the light source and from imperfections in the glass cuvette.
- LEDs have a much higher luminous efficiency, providing more light while using less power. They also produce little heat, which could otherwise affect electronic stability.

CAL Check™

- Validate instrument performance at any time using CAL Check cuvettes made with NIST traceable standards.
 The CAL Check screen guides the user step-by-step through the validation process and user calibration.
- On-screen tutorial mode with animations
 - · Guides users step-by-step through the measurement process

- Waterproof and floating IP67 case
- Unit of measure is displayed along with reading
- · Built-in timer
 - Built-in reaction timer that ensures consistency between tests.
- Error messages on display
 - Alerts to problems including no cap, high zero, and standard too low
- GLP data
 - · Displays the last calibration date.
- · Auto logging
- Battery status indicator
- · Auto-shut off
