ORP Solutions & ISE Solutions

ORP Solutions

ORP standard solutions allows users to test the precision of ORP electrodes. For example, by immersing the electrode in HI 7020 solution, readings should fall within the 200 to 275 mV range (@20°C/68°F).

If the reading is outside the indicated value, clean and condition your ORP electrode in Hanna pretreatment solution. Use HI 7092 for oxidizing or HI 7091 for reducing pretreatment.

ISE Standards

Our wide selection of Hanna ISE Standards are made and bottled in our own state of the art solutions facility. ISE Standards are required for direct and incremental measurement techniques and are supplied with certificate of analysis.
